- Node.js
- Angular
- TypeScript
- MongoDB
- JavaScript
- React Js
- Express.js
- Git
- Firebase
- HTML5

### LANGUAGES

- English (Intermediate)
- Spanish (Native)

### PROFILE

I am Lucas Leiro, a programming technician graduated from the National Technological University (UTN) in Tucumán, Argentina. At 22 years old, I am a practical and meticulous person, always focused on doing things right from the start and then optimizing them to achieve greater productivity. I have an entrepreneurial spirit and a great passion for programming, enjoying creating applications and developing innovative solutions. My creative mindset allows me to bring fresh and effective ideas to the teams and projects I participate in. I am convinced that I can add great value with my experience, dedication, and creativity.

### WORK EXPERIENCE

#### Fina Partner

2024-PRESENT

FullStack Developer

- We developed a comprehensive web application from scratch, utilizing Node.js, Express, and TypeScript for the backend, and Angular for the frontend. This administrative platform is designed to efficiently manage the services offered by Fina, ensuring seamless operations and enhanced user experience.

#### Freelance Work

2023-2024

Front-End Developer

- Create and manage the booking platform, ensuring seamless communication for reservation requests via messages and emails.
- Oversee the use of HTML, JavaScript, CSS, Bootstrap, and Firebase to develop a responsive and efficient hotel website.
- Monitor brand consistency across all online channels to enhance user experience and maintain a cohesive brand image.

FullStack Developer

2023-2024

- Developed an application with Node.js using Firebase to manage a kiosk, enabling sales with accurate stock control.
- Implemented detailed sales and cancellation reports accessible by various criteria such as date ranges.
- Ensured seamless functionality for monitoring and optimizing sales operations.
